WORK EXPERIENCE

Lead Product Designer — 2022- Present
Keap/Thryv

Keap (Acquired by Thryv) is a leading SaaS company that empowers small businesses with sales and marketing automation solutions.

- Own design direction for landing pages, email automation, and forms across two development teams
- Led Form Unification across multiple forms and customer flows, shipped in stages to reduce risk and bring consistency to the experience
- Drove the DEX design system migration, replacing duplicate components with shared patterns that teams reuse across products
- Built AI assisted workflows in Claude Code and Figma to speed up research synthesis and prototyping
- Set research and testing standards so product decisions are grounded in usability findings and product analytics
- Align PMs, PMMs, and engineering on go to market priorities, and mentor junior designers through critique and growth planning

Senior UX/UI Designer — 2020- 2022
Blue Raster

Blue Raster is a digital agency specializing in data visualization and geospatial solutions for government and enterprise clients.

- Led UX and UI design from research through launch on government and enterprise projects, improving user adoption
- Standardized design workflows across designers and developers, establishing consistency standards for client deliverables
- Translated complex data needs from government and enterprise clients into clear, usable interfaces

Product Designer — 2017- 2020
Allego

Allego is an enterprise learning platform focused on sales enablement and team collaboration.

- Designed sales enablement tools for enterprise customers
- Shipped features from concept to release alongside senior designers and engineers
- Built enterprise UX and research skills that carried into later roles in B2B SaaS
